---

Thank you for the concern Linda but rest assured I approach everything with caution and I also recognize the sometimes obvious. So that's why I am willing to own my statements and I am not as concerned with my political status as I am about the well being of our Nation. I can only assume my concerns will be held in confidentiality rather than positioned for political gain so with that said I caution everyone to take the time to evaluate this individual and his associates actions as bringing potential harm to our Nation. I would like to refer back to my previous email and point out that it is not the tribal members that bring concern to me it is the non tribal individual that does not share the same rights as an enrolled member but seems to be confused about his place in our government. In my opinion he has no place there.

Vice-Chairman Matson,

My understanding is the Oneida Land Commission held a "public hearing" today at the Oneida Land Office at 4:00 PM regarding an Oneida Tribal Member's request for a variance to have the property that is currently zoned as "residential" changed over to being zoned as "business".

With regard to your statement "this individual needs to be assumed a Terrorist and is acting in ways of espionage", I caution you to be very careful with your statement/allegations as an elected official.

Respectfully,

Linda S. Dallas

On a different subject, it has been brought to my attention that Leah Dodge, and John Orie where at the Land office today, that does not bring great concern to me but I understand that Jason Fitzgerald was there as well. Jason is the live in partner of Ms. Dodge and is not a tribal member, that is where my concern is. I have great concern that this individual is using tribal members to acquire information about the Oneida Tribe, including Government information, that he then uses to create turmoil. I believe this individual needs to be assumed a Terrorist and is acting in ways of espionage
